ABOUT ME.

Highly motivated DevSecOps Engineer with 5+ years of experience managing large-scale, cloud-based production environments on AWS and GCP. Specialized in security automation, compliance, and infrastructure security while maintaining DevOps best practices. Strong background in CI/CD pipelines, cloud security, vulnerability management, and security compliance frameworks (ISO 27001, SOC2, NIST). Passionate about bridging the gap between DevOps and security to ensure resilient, scalable, and secure systems

RELEVANT SKILLS

- Bash, Python, Ansible, Terraform.
- K8s, K3s, AWS, GCP, Linux admin.
- ISO27001:2022, SOC2, NIST.
- PT, Phishing, BCP, DR, Incident response.

WORK EXPERIENCE

DevSecOps Engineer Scopio Labs, Israel | July 2023 -

Present

- App Security Automation & Compliance: Implemented automated security scans (SAST/DAST) in CI/CD pipelines to detect vulnerabilities early in the development cycle.
- Cloud Security & Compliance: Strengthened **AWS + GCP** security posture.
- Compliance & Security: Assisted in achieving **ISO 27001 & SOC2** compliance by implementing security policies, risk assessments, and ongoing security audits.
- Kubernetes Management: Successfully deployed and managed **EKS and K3s** (Kubernetes on-prem) at scale, optimizing resource efficiency and security.

DevOps Engineer Antidote Health, Israel | July 2022 - July 2023

- Designed, developed, tested, and delivered a **production** Kubernetes (GKE) environment from scratch using DevOps methodologies.
- Utilized Helm chart of charts, build, test automation, and monitoring software and infrastructure to ensure reliability and scalability of the environment.
- Collaborated with development teams to ensure smooth integration of their applications into the Kubernetes environment.
- Conducted thorough testing and troubleshooting to identify and resolve any issues with the environment.
- Provided documentation and training to team members on how to use and maintain the Kubernetes environment.

Junior DevOps Engineer Scopio Labs, Tel Aviv, Israel | Feb 2020 - July 2022

- Maintained software and hardware systems (**Linux, Nvidia**) to ensure optimal performance and reliability.
- Managed the AWS account of the company, including IAM permission management, VMs, DBs, and more..
- Managed the full cycle of the CI/CD to ensure a smooth deployment process using Jenkins on k8s.
- Developed and maintained infrastructure as code using tools such as Ansible and Terraform.
- Collaborated with development teams to review infrastructure architecture and implement new flows.
- Conducted security assessments and implemented security best practices across the infrastructure due to a compliance regulation. (GDPR, HIPAA, ISO27001, 27799, SOC2)
- Provided documentation and training to team members on how to use and maintain the systems.

EDUCATION HISTORY

CISO

Technion | Oct 2023 - Oct 2024

Devops Engineer

Devops Engineer at Docker Mastery | January 2018 - January 2019

Full-Stack Developer

Full-Stack Developer at John Bryce | January 2018 - January 2019

Front End, Back End, Data Base, Node, CSM
